ADJUSTABLE WRISTSTRAP (10mm male stud fitted)

Code: **CCL/AWS/01**

This recently updated designed ESP Wrists-strap incorporates all of the excellent properties of previous versions. A non-allergy forming silver coated conductive filaments woven into the elasticated webbing provides an effective path for static charge to be grounded away and a knitted cotton inner layer gives extra comfort to the operative and minimises skin irritation normally associated with synthetic materials.

The insulative outer layer avoids any risks to personnel from contact with electrical equipment

Supplied with a 10mm male stud for ready connection with 10mm snap-on coily cords the adjustable strap once fitted to the operative's wrist can be adjusted to suit simply by pulling the strap through the buckle to form a comfortable fit around the wrist.

Excess strap material can be cut off with scissors to provide for a custom fitted wrist-strap made to suit any one particular operative thus preventing sharing if required.
