Economy Static Control Field Service Kit

Code: **CCL/EFSK/01**

Designed to be used where static sensitive components and devices are being handled, installed or stored to provide a simple, but effective, low cost, immediately usable static controlled area.

The kit comes assembled and is simply unfolded ready for instant use.

The kit can be used by engineers working in the field where the need to have access to a static safe working area is not an everyday requirement; hence this simple, low cost, no maintenance system has been devised.

As the kit is low cost, it is ideal for dispatching or shipping out with orders for individual items such as pcbs, pc cards, cpus, ICs and memory chips etc. On receipt, these items may need to be counted, checked before storage or immediate use and other forms of static control are not available or do not exist. It therefore enables the supplier and or manufacturer to provide some immediate protection for their products prior to full or complete static safe areas being available.

Specification Details:

300mm x 350mm (12" x 14") Static Dissipative Matting
(10^9 ohms/sq surface resistivity)

Straight earth connector cords

Non-adjustable (one size) wrist strap

Straight earth connector cords

Non-adjustable (one size) wrist strap

1Mohm resistor

To provide protection each kit is supplied in a clear plastic, re-usable tube

All information is given in good faith but without warranty.
